Simple accounting for a complex world

How to save money and control costs...

.... let *LogiBooks*⁺ balance your accounts

Quality balanced with Value

Though *LogiBooks*⁺ is designed to be the very best accounting solution available, we are certain that you will be surprised by its competitive pricing policy. 

Provide yourself with an innovative solution that intelligently balances the many opposing objectives of good package design, resulting in a product whose quality is unsurpassed in the industry. Being AS/400 based, it provides a company-wide solution NOT restricted to individual users: *LogiBooks*⁺ truly represents exceptional value for your money. 

Strength balanced with Flair

Take full advantage of the elegant solidity and robust design architecture of the AS/400 mid-range, and build on it to provide quality applications that really are Millennium-worthy, efficient, durable and attractive. 

Integrated Systems balanced with Modular Structure

Remove your stress when installing new systems by using a clean and simple interface strategy. Allow modules to be installed individually and implemented incrementally. Or allow a permanent mix of legacy systems and *LogiBooks*⁺ modules. 

The basic *LogiBooks*⁺ modules are the General Ledger, Accounts Receivable and Accounts Payable. Others include Purchasing, Sales, Prospect Management/Marketing Support and Inventory. 

**“Easy to use, and
proven results. What
more could you ask for?”**

Flexibility balanced with Sturdiness

Allow yourself the same simplicity and flexibility that was inherent in traditional manual systems. With foolproof detective controls and fully audited, simple correction procedures, *LogiBooks*⁺ represents the next generation of computerized accounting applications: intuitive flexibility coupled with first class controls and audit. 

Cause balanced with Effect

Innovative, immediate posting and consolidation facilities, together with the outstanding “who, when, why” cross referencing, lets you see the effect of transactions immediately, and makes the whole system easy to understand. 

Ease of Use balanced with Comprehensiveness

You will find it easy to install and there is normally no need for training. Unlike any PC-based solution, user friendliness goes together with the predictability, reliability, controls and recovery needed for a critical business system. Give yourself a truly current solution to act as a sound basis for tackling the issues of the next Millennium. 

Established Maturity balanced with Innovation

The ideal combination of maturity and innovation. The software is tried, tested and already in use by demanding users. It incorporates modern and innovative ideas. A continuous drive for excellence has evolved a set of design example application templates into the outstanding packages you can see today.
